

L5P 6.6L DURAMAX (2017-2024)

Installation Manual

Important

While this product is Warranty-Friendly and does not change or delete any stock settings or equipment, we recommend you **“Take it off before you take it in”** for service, while under warranty to avoid visual contact.

Important Pre-Install Info.

***The Key fob must be away from the vehicle for the entire installation process.**

Be sure your truck has been off with the hood unlatched and key fob located away from the vehicle for at least 20 minutes before installing your module, and avoid opening doors...ECM must be asleep during install.

Warranty-friendly Performance Module

Wiring Harnesses

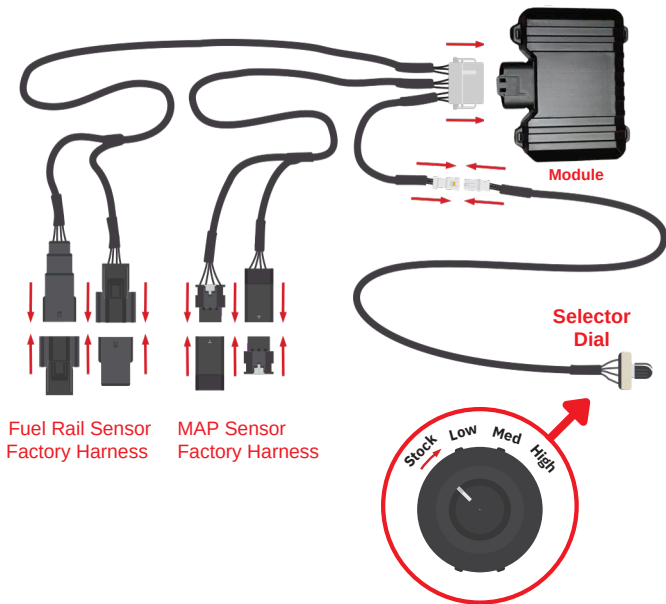

HP Selector Dial

Zip-ties

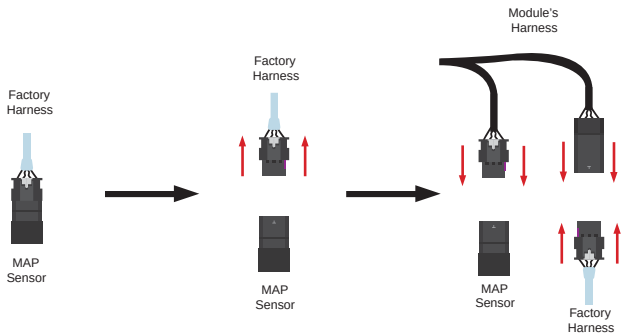

Harness Layout

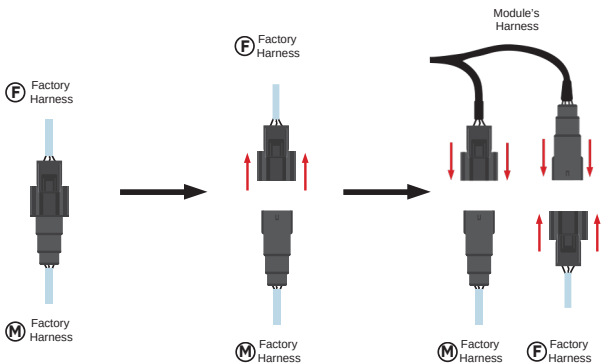

NOTE: Your module performs best if you avoid rapidly changing between **L - M - H** setting

We recommend running the (low) setting for the first tank of fuel to allow for your truck's "Adaptive Learning" system.
